Sailing, Power & Navigation Instruction
Yacht Management and Delivery

Our Professional Instructors Average More than 20 Years Experience On The Water Boat Rentals & Yacht Charters
First American Sailing Association & International Yacht Training Facility in the World Group / Private Lessons

NAUTICAL TELEVISION, MOVIE, FILM, & RADIO

Rev. 1/08

(featuring or supported by Bluewater Sailing)

Bluewater Sailing has a great deal of experience in providing film boats, location support, background stories with nautical themes as well as sets for television, film, commercial, model shoots and other productions.

Bluewater has been specifically featured on NBC's 'Today Show in a starring role, in addition to our production assistance.

We've done television, film, radio and print media with many large corporate as well as smaller, independent operations within the entertainment industry.

These programs have included live feeds, short spots, special documentaries, reality programs, ½ hour & one hour shows as well as script / location consulting on various projects, including books & novels.

Some of our participation has centered on Bluewater's international reputation for outstanding sail education while other programs have been based on Bluewater's background in providing high quality skippered yacht charters or bareboat rentals. Throughout this process, Bluewater has worked with customers from over 65 countries. Bluewater is also known within the industry as the first facility certified by both the American Sailing Association (ASA) as well as International Yacht Training (IYT).

Bluewater can assist in "setting up" or "making the shot" in a timely and efficient process. We can often save production time based on our extensive, prior experience with boats, weather, camera set-ups and sea conditions. Bluewater is happy to do everything we can to make your concepts come to fruition. You tell us what you would like to accomplish and we'll make it happen out on the water, subject to safety and the laws of physics.

Our extensive experience allows us to offer supportive technical knowledge for consideration by the producer or director in suggesting shot possibilities, chase boat options as well as assisting with challenging issues faced when operating out on the water. You know more about your project than we do, but Bluewater may know more about to best deal with many unique issues including but not limited to boat motion on the ocean as it affects focal lengths and camera speeds as well as obtaining the best sun angles as it reflects off the water. We can take your direction or work together in partnership to improve efficiency, striving to achieve Bluewater's cost effective goal of 'getting as much high quality 'film in the can' as quickly as possible'.

Please contact us if we can help with your concept!
